THE CONNECTED STATION
THAT MAKES LIFE EASIER.
FOR CLEAN, CRYSTAL CLEAR
POOL WATER.

*Ico Station
watches over
your pool water
quality*

BWT Ico Station

TREATING YOUR POOL WATER? IT'S EASY WITH ICO!
ICO IS A COMPACT SMART MODULE MODULE THAT ANALYSES AND TESTS YOUR POOL WATER PARAMETERS IN REAL TIME. IT PREDICTS LOCAL WEATHER PATTERNS, MAKES RECOMMENDATIONS AND SENDS THEM TO YOUR SMARTPHONE.

Temperature, pH, Redox, salinity, conductivity, algae and scale content, the presence of invisible bacteria, etc. ICO keeps you continuously informed if your pool water is really safe for swimming or if it requires attention. A precious tool for a worry-free safe and pleasant bathing experience.

ICO's on-board artificial intelligence monitors local weather forecasts and modifies its recommendations to adapt to sudden temperature spikes or storms. Just what you need to act in time and prevent your pool water turning green.

By continuously monitoring the pool water, ICO predicts water imbalances and reduces the use of pool chemicals. Good for you, good for the environment.

ICO radically simplifies pool care and maintenance. It prevents dosing errors and avoids the unpleasantness of water that irritates the skin and attacks pool equipment.

Constantly connected, ICO watches over your pool water 24/7. Information is sent to you wherever you are, in real time.

Analysis
